Internet (400 words)

In the past decades, internet has found a crucial place in the working of many different fields which includes banks, schools, industries and others. People have benefited from this technology in both their professional and personal lives. With internet around, we can get answers to all our questions in just a matter of seconds. An internet connection these days is quite easy to establish at homes and offices.

Use of Internet in Various Fields

The use of internet has been expanded to many fields in recent times. People have become more aware and used to the advantages and disadvantages of internet and its applications. The various fields in which internet is used are as follows:

Communication: Internet has effectively altered the way we communicate. Posts and telegrams have been replaced by cellular phones, webcams and messaging applications. These new found methods of communications are more effective and quick.

Education: With the advancement in internet and its reach to all parts of the world, students and other people staying in remote areas can opt for distance learning courses and can also access a wide range of information available on the internet to educate themselves in various subjects.

E-commerce: E-commerce is a taking a huge hit these days. With the emergence of various e-commerce websites such as Flipkart, Amazon, Snapdeal and the likes, people have formed an affirmative opinion about shopping online. This is a convenient method as you don't need to leave the comfort of your home to purchase different things.

Internet Banking: Almost all the banks these days provide options for net banking. Using this feature, you can pay bills online and conduct money transactions effectively. Though while using these features, one has to be aware and alert about the growing cyber-crimes over the internet.

Entertainment: Along with all the above stated activities, internet provides lots of options for entertainment such as movies, TV series, educational videos, news headlines around the world and anything you need.

Conclusion

The features stated above are extremely useful to us if proper care is taken. While on the internet we should be careful and take responsibility of our actions. Children should be taught about the pros and cons of using internet so that they can be protected from the evils of cyber-crime. We should stand up against these kinds of crimes and ensure safety. Indulging in such crimes is a punishable offence and one should fear the law of the country.
